INDEX TO VOLUME 36 2001

Index to Authors and Contributors

AHMAD, I. *Paper* Deformations and stresses in pin-loaded tubes: multiple holes and effects of various loadings, 35
ALEXANDROV, S. *Paper* Thermal effects on the development of plastic zones in thin axisymmetric plates, 169
ALEXANDROVA, N. *Paper* Thermal effects on the development of plastic zones in thin axisymmetric plates, 169
ALLWRIGHT, D. J. *Paper* Buckling of a spherical shell embedded in an elastic medium loaded by a far-field hydrostatic pressure, 535

BALENDRA, R. *Paper* Finite element investigation into the torsion test in the range of large strains and deformations, 401
BARONE, S. *Paper* Grid pattern for in-plane strain measurements by digital image processing, 51
BECKER, A. A. *Paper* Development of new inverse boundary element techniques in photoelasticity, 253
BERGHINI, M. *Paper* Grid pattern for in-plane strain measurements by digital image processing, 51
BERT, C. W. *Technical Note* Generalized bending of a plate with a circular inclusion of arbitrary rigidity, 341
BERTINI, L. *Paper* Grid pattern for in-plane strain measurements by digital image processing, 51
BRADON, J. E. *Paper* Analysis of a resin socket termination for a wire rope, 71
BROWNE, P. A. *Paper* Synchrotron X-ray residual strain scanning of a friction stir weld, 61
BURGUETE, R. *Paper* A photoelastic analysis of crescent-shaped cracks in bolts, 93

CAMARÃO, A. F. *Paper* Analysis of residual stresses generated by progressive induction hardening of steel cylinders, 507
CARNEIRO, J. A. O. *Paper* The dynamic analysis of piping systems using pseudo-dynamic techniques, 441
CHANG, E. *Paper* Characteristic parameters for stress distribution along the intersection of tubular Y, T, X and DT joints, 323
CHANG, T. *Paper* Three-dimensional effects for through-thickness cylindrical inclusions in an elastic plate, 277
CHAPLIN, C. R. *Papers* Analysis of a resin socket termination for a wire rope, 71. Wire strain variations in normal and overloaded ropes in tension–tension fatigue and their effect on endurance, 219. Wire failures in ropes and their influence on local wire strain behaviour in tension–tension fatigue, 231
CHEN, D. *Paper* Development of new inverse boundary element techniques in photoelasticity, 253
CHEN, S.-C. *Paper* The strengths of steels under combined static tensile and torsional loading, 89
CIAVARELLA, M. *Technical Note* The design of hydrodynamically lubricated journal bearings against crack propagation, 245
CINDRA FONSECA, M. P. *Paper* Residual stress state behaviour under fatigue loading in pipeline welded joints, 465
COOK, I. T. *Paper* Assembly stresses in taper-locking shaft couplings. Part 1: photoelastic work, 25
CORREIA da CRUZ, A. B. *Paper* Residual stress state behaviour under fatigue loading in pipeline welded joints, 465

DATTOMA, V. *Paper* Local strain for fatigue strength of welded structures, 605
DECUZZI, P. *Technical Note* The design of hydrodynamically lubricated journal bearings against crack propagation, 245
de MELO, F. J. M. Q. *Paper* The dynamic analysis of piping systems using pseudo-dynamic techniques, 441
DIAS RODRIGUES, J. F. *Paper* The dynamic analysis of piping systems using pseudo-dynamic techniques, 441
DIXON, M. W. *Paper* The strengths of steels under combined static tensile and torsional loading, 89
DJAPIC OOSTERKAMP, L. *Paper* Synchrotron X-ray residual strain scanning of a friction stir weld, 61
DONG, H. R. *Paper* Three-dimensional effects for through-thickness cylindrical inclusions in an elastic plate, 277
DOVER, W. D. *Paper* Characteristic parameters for stress distribution along the intersection of tubular Y, T, X and DT joints, 323
DRAGONI, E. *Paper* Designing the cross-section of curved beams for equal magnitude of peak bending stresses, 473
DULIEU-BARTON, J. M. *Paper* Determination of the stress distribution in foam-cored sandwich construction composite tee joints, 545

EARL, J. S. *Paper* Determination of the stress distribution in foam-cored sandwich construction composite tee joints, 545
EVANS, J. J. *Papers* Wire strain variations in normal and overloaded ropes in tension–tension fatigue and their effect on endurance, 219. Wire failures in ropes and their influence on local wire strain behaviour in tension–tension fatigue, 231
EVANS, M. *Paper* High-temperature oxidation and the prediction of creep life for 0.5Cr–0.5Mo–0.25V steel, 421

FAGAN, M. J. *Paper* A review and detailed examination of non-layered conformal contact by finite element anlaysis, 177
FATEMI, A. *Paper* Elasto-plastic stress and strain behaviour at notch roots under monotonic and cyclic loadings, 287
FELLOWS, N. A. *Paper* Localization of plastic deformation during high strain rate torsion testing of rolled homogeneous armour, 197
FENNER, R. T. *Paper* A force field superposition approach to plane elastic stress and strain analysis, 517
FESSLER, H. *Paper* Assembly stresses in taper-locking shaft couplings. Part 1: photoelastic work, 25
FOK, S.-L. *Paper* Buckling of a spherical shell embedded in an elastic medium loaded by a far-field hydrostatic pressure, 535

GHOO, B. Y. *Paper* New forming limit diagram of laser tailored blank, 143
GOWHARI-ANARAKI, A. R. *Paper* Elastic and elastic–plastic finite element analysis of hollow tubes with axisymmetric internal projections under combined axial and pressure loading, 373. *Technical Note* Design equations for elastic stress concentration factors in hollow tubes with axisymmetric internal projections subjected to axial loading, 531. *Paper* Upper and lower bound limit and shakedown loads for hollow tubes with axisymmetric internal projections under axial loading, 595
GUAGLIANO, M. *Paper* Mechanical behaviour prediction in plain weave composites, 153
GUO, W. *Paper* Three-dimensional effects for through-thickness cylindrical inclusions in an elastic plate, 277

HAN, B. *Paper* Moiré interferometry for engineering mechanics: current practices and future developments, 101
HARDING, J. *Paper* Localization of plastic deformation during high strain rate torsion testing of rolled homogeneous armour, 197
HARDY, S. J. *Paper* Elastic and elastic–plastic finite element analysis of hollow tubes with axisymmetric internal projections under combined axial and pressure loading, 373. *Technical Note* Design equations for elastic stress concentration factors in hollow tubes with axisymmetric internal projections subjected to axial loading, 531. *Paper* Upper and lower bound limit and shakedown loads for hollow tubes with axisymmetric internal projections under axial loading, 595
HARRIS, J. *Paper* Fuzzy logic methods in fatigue and creep, 411
HEYES, P. *Paper* A photolastic analysis of crescent-shaped cracks in bolts, 93
HILLS, D. A. *Paper* Interference contact between a pin and plate with a hole, 499
HOBBS, J. *Paper* A photoelastic analysis of crescent-shaped cracks in bolts, 93
HOU, J. P. *Paper* Interference contact between a pin and plate with a hole, 499
HSIEH, M. F. *Paper* An assessment of ASME III and CEN TC54 methods of determining plastic and limit loads for pressure system components, 301
HUEY Jr, C. O. *Paper* The strengths of steels under combined static tensile and torsional loading, 89

HUGHES, D. J. *Paper* Synchrotron X-ray residual strain scanning of a friction stir weld, 61
HYDE, T. H. *Papers* Assembly stresses in taper-locking shaft couplings. Part 1: photoelastic work, 25. Development of new inverse boundary element techniques in photoelasticity, 253. Macroscopic fretting variables in a splined coupling under combined torque and axial load, 481

IFJU, P. *Paper* Moiré interferometry for engineering mechanics: current practices and future developments, 101

JONES, I. A. *Paper* Development of new inverse boundary element techniques in photoelasticity, 253

KANG, W. P. *Paper* Synchrotron X-ray residual strain scanning of a friction stir weld, 61
KEBADZE, E. *Paper* Slip initiation and progression in helical armouring layers of unbonded flexible pipes and its effect on pipe bending behaviour, 265
KEUM, Y. T. *Paper* New forming limit diagram of laser tailored blank, 143
KORSUNSKY, A. M. *Paper* The influence of punch blunting on the elastic indentation response, 391
KRAINCANIC, I. *Paper* Slip initiation and progression in helical armouring layers of unbonded flexible pipes and its effect on pipe bending behaviour, 265

LEEN, S. B. *Paper* Macroscopic fretting variables in a splined coupling under combined torque and axial load, 481
LI, W. *Paper* Determining Young's modulus of conductive thin films by a thermal bend beam test, 163
LIN, Y.-Y. *Paper* Elastic–plastic finite element analysis for oblique cutting with a discontinuous chip of 6–4 brass, 579
LIN, Z.-C. *Paper* Elastic–plastic finite element analysis for oblique cutting with a discontinuous chip of 6–4 brass, 579
LOPES, H. R. *Paper* The dynamic analysis of piping systems using pseudo-dynamic techniques, 441
LYNCH, M. *Paper* An assessment of ASME III and CEN TC54 methods of determining plastic and limit loads for pressure system components, 301

McCOLL, I. R. *Paper* Macroscopic fretting variables in a splined coupling under combined torque and axial load, 481
McCONNACHIE, J. *Paper* A review and detailed examination of non-layered conformal contact by finite element analysis, 177
MEDINA-VELARDE, J. L. *Paper* Experimental study of fast ductile crack growth in aluminium alloy 2014 panels, 561
MOFFAT, D. G. *Paper* An assessment of ASME III and CEN TC54 methods of determining plastic and limit loads for pressure system components, 301
MONNO, G. *Technical Note* The design of hydrodynamically lubricated journal bearings against crack propagation, 245
MUNSI, A. S. M. Y. *Paper* Vibratory stress relief—an investigation of the torsional stress effect in welded shafts, 453

NAIK, N. K. *Paper* Twisted impregnated yarns: transverse tensile strength, 347
NANDI, A. *Paper* Modelling of rotors with three-dimensional solid finite elements, 359
NEOGY, S. *Paper* Modelling of rotors with three-dimensional solid finite elements, 359

PACHECO, P. M. C. L. *Paper* Analysis of residual stresses generated by progressive induction hardening of steel cylinders, 507
PAINTER, M. J. *Paper* Numerical methods to predict failure during the in-service welding of gas pipelines, 611
PAPPALETTERE, C. *Paper* Local strain for fatigue strength of welded structures, 605
PARK, S. W. *Paper* New forming limit diagram of laser tailored blank, 143
PATTERSON, E. *Paper* A photoelastic analysis of crescent-shaped cracks in bolts, 93
PENG, L. H. *Paper* Determining Young's modulus of conductive thin films by a thermal bend beam test, 163
PENG, X. *Paper* Finite element investigation into the torsion test in the range of large strains and deformations, 401
PETRINIC, N. *Paper* Experimental study of fast ductile crack growth in aluminium alloy 2014 panels, 561
PIPELZADEH, M. K. *Papers* Elastic and elastic–plastic finite element analysis of hollow tubes with axisymmetric internal projections under combined axial and pressure loading, 373. Upper and lower bound limit and shakedown loads for hollow tubes with axisymmetric internal projections under axial loading, 595.
POST, D. *Paper* Moiré interferometry for engineering mechanics: current practices and future developments, 101
PUGNO, N. *Paper* Tubular bonded joint under torsion: theoretical analysis and optimization for uniform torsional strength, 17

Subject Index

A COMPARATIVE STUDY OF THREE-DIMENSIONAL AND TWO-DIMENSIONAL FINITE ELEMENT ANALYSES FOR INTERSECTING SHELLS, *Paper*, 313
A FORCE FIELD SUPERPOSITION APPROACH TO PLANE ELASTIC STRESS AND STRAIN ANALYSIS, *Paper*, 517
Aluminium alloy 2014 panels, 561
Analysis:
  dynamic, of piping systems, 441
  elastic–plastic finite element, 373, 579
  finite element, 177, 313
  of a resin socket termination, 71
  of residual stresses, 507
  photoelastic, 93
  strain, 517
  theoretical, 17
ANALYSIS OF A RESIN SOCKET TERMINATION FOR A WIRE ROPE, *Paper*, 71
ANALYSIS OF RESIDUAL STRESSES GENERATED BY PROGRESSIVE INDUCTION HARDENING OF STEEL CYLINDERS, *Paper*, 507
AN ASSESSMENT OF ASME III AND CEN TC54 METHODS OF DETERMINING PLASTIC AND LIMIT LOADS FOR PRESSURE SYSTEM COMPONENTS, *Paper*, 301
A PHOTOELASTIC ANALYSIS OF CRESCENT-SHAPED CRACKS IN BOLTS, *Paper*, 93
A REVIEW AND DETAILED EXAMINATION OF NON-LAYERED CONFORMAL CONTACT BY FINITE ELEMENT ANALYSIS, *Paper*, 177
Armour:
  helical, 265
  rolled homogeneous, 197
ASME III method, 301
ASSEMBLY STRESSES IN TAPER-LOCKING SHAFT COUPLINGS. PART 1: PHOTOELASTIC WORK, *Paper*, 25
Axisymmetric:
  internal projections, 373, 531, 595
  plates, thin, 169

Beam:
  curved, 473
  curved orthotropic, 1
  thermal bend, 163
Bearings, hydrodynamically lubricated journal, 245
Behaviour:
  flexural, 1
  local wire strain, 231
  mechanical, 153
  pipe bending, 265
  residual stress state, 465
  strain, 287
Bending:
  generalized, 341
  pipe, 265
  stresses, 473
Bimaterial interfaces, 119
Blank, laser tailored, 143
Blunting, punch, 391
Bolts, 93
Boundary element, inverse, 253
Brass, 6–4, 579
Buckling, 535
BUCKLING OF A SPHERICAL SHELL EMBEDDED IN AN ELASTIC MEDIUM LOADED BY A FAR-FIELD HYDROSTATIC PRESSURE, *Paper*, 535

CEN TC54, method, 301
CHARACTERISTIC PARAMETERS FOR STRESS DISTRIBUTION ALONG THE INTERSECTION OF TUBULAR Y, T, X AND DT JOINTS, *Paper*, 323
Chip, discontinuous, 579
Components, pressure system, 301
Composites, plain weave, 153
Concentration:
  factors, elastic stress, 531
  stress, 211
Contact, non-layered conformal, 177
Couplings:
  splined, 481
  taper-locking shaft, 25
Cracks:
  crescent-shaped, 93
  growth, fast ductile, 561
  propagation, 245
Creep, 411, 421
Cutting, oblique, 579
Cylinders, steel, 507

Deformations:
  in pin-loaded tubes, 35
  large, 401
  plastic, 197
DEFORMATIONS AND STRESSES IN PIN-LOADED TUBES: MULTIPLE HOLES AND EFFECTS OF VARIOUS LOADINGS, *Paper*, 35
Design equations, 531
DESIGN EQUATIONS FOR ELASTIC STRESS CONCENTRATION FACTORS IN HOLLOW TUBES WITH AXISYMMETRIC INTERNAL PROJECTIONS SUBJECTED TO AXIAL LOADING, *Technical Note*, 531
DESIGNING THE CROSS-SECTION OF CURVED BEAMS FOR EQUAL MAGNITUDE OF PEAK BENDING STRESSES, *Paper*, 473
DETERMINATION OF THE STRESS DISTRIBUTION IN FOAM-CORED SANDWICH CONSTRUCTION COMPOSITE TEE JOINTS, *Paper*, 545
DETERMINING YOUNG'S MODULUS OF CONDUCTIVE THIN FILMS BY A THERMAL BEND BEAM TEST, *Paper*, 163
DEVELOPMENT OF NEW INVERSE BOUNDARY ELEMENT TECHNIQUES IN PHOTOELASTICITY, *Paper*, 253
Digital image processing, 51
Distribution, stress, 323, 545

Elastic:
  finite element analysis, 373
  foundation, 1
  indentation, 391
  medium, 535
  plate, 277
ELASTIC AND ELASTIC–PLASTIC FINITE ELEMENT ANALYSIS OF HOLLOW TUBES WITH AXISYMMETRIC INTERNAL PROJECTIONS UNDER COMBINED AXIAL AND PRESSURE LOADING, *Paper*, 373
Elastic–plastic finite element analysis, 373, 579
ELASTIC–PLASTIC FINITE ELEMENT ANALYSIS FOR OBLIQUE CUTTING WITH A DISCONTINUOUS CHIP OF 6–4 BRASS, *Paper*, 579
Elasto–plastic stress and strain, 287
ELASTO-PLASTIC STRESS AND STRAIN BEHAVIOUR AT NOTCH ROOTS UNDER MONOTONIC AND CYCLIC LOADINGS, *Paper*, 287
Element:
  inverse boundary, 253
  three-dimensional solid finite, 359
Endurance, 219
EXPERIMENTAL STUDY OF FAST DUCTILE CRACK GROWTH IN ALUMINIUM ALLOY 2014 PANELS, *Paper*, 561

Failure:
  numerical methods to predict, 611
  wire, 231
Fatigue, 411
  loading, 465
  strength, 605
  tension–tension, 219, 231
Films, conductive thin, 163

© IMechE 2001

Finite element analysis, 177, 313
  elastic and elastic–plastic, 373
  investigation, 401
FINITE ELEMENT INVESTIGATION INTO THE TORSION TEST IN THE RANGE OF LARGE STRAINS AND DEFORMATIONS, *Paper*, 401
Flexural behaviour, 1
FLEXURAL BEHAVIOUR OF A CURVED ORTHOTROPIC BEAM ON AN ELASTIC FOUNDATION, *Paper*, 1
Force field, 517
Fracture, high-speed, 119
Fretting, macroscopic, 481
Friction stir weld, 61
Fuzzy logic, 411
FUZZY LOGIC METHODS IN FATIGUE AND CREEP, *Paper*, 411

GENERALIZED BENDING OF A PLATE WITH A CIRCULAR INCLUSION OF ARBITRARY RIGIDITY, *Technical Note*, 341
GRID PATTERN FOR IN-PLANE STRAIN MEASUREMENTS BY DIGITAL IMAGE PROCESSING, *Paper*, 51
Grooves, symmetric U-shaped, 211

Hardening, induction, 507
HIGH-SPEED FRACTURE STUDIES ON BIMATERIAL INTERFACES USING PHOTOELASTICITY—A REVIEW, *Review Paper*, 119
HIGH-TEMPERATURE OXIDATION AND THE PREDICTION OF CREEP LIFE FOR 0.5Cr–0.5Mo–0.25V STEEL, *Paper*, 421
Holes, 499
  multiple, 35
Hydrodynamically lubricated journal bearings, 245
Hydrostatic pressure, far-field, 535

Inclusions:
  circular, of plate, 341
  through-thickness cylindrical, 277
Indentation, elastic, 391
Induction hardening, 507
Interfaces, bimaterial, 119
Interference contact, 499
INTERFERENCE CONTACT BETWEEN A PIN AND PLATE WITH A HOLE, *Paper*, 499
Interferometry, Moiré, 101

Joint:
  foam-cored sandwich construction composite tee, 545
  pipeline welded, 465
  tubular bonded, 17
  tubular Y, T, X and DT, 323
Journal bearings, hydrodynamically lubricated, 245

Laser tailored blank, 143
Layers, helical armouring, 265
Limit, upper and lower bound, 595
Loading:
  axial, 531, 595
  combined axial and pressure, 373
  combined torque and axial, 481
  cyclic, 287
  fatigue, 465
  limit, 301
  monotonic, 287
  plastic, 301
  shakedown, 595
  tensile, 89
  torsional, 89
  various, 35
LOCALIZATION OF PLASTIC DEFORMATION DURING HIGH STRAIN RATE TORSION TESTING OF ROLLED HOMOGENEOUS ARMOUR, *Paper*, 197
LOCAL STRAIN FOR FATIGUE STRENGTH OF WELDED STRUCTURES, *Paper*, 605

MACROSCOPIC FRETTING VARIABLES IN A SPLINED COUPLING UNDER COMBINED TORQUE AND AXIAL LOAD, *Paper*, 481
Measurements, in-plane strain, 51
MECHANICAL BEHAVIOUR PREDICTION IN PLAIN WEAVE COMPOSITES, *Paper*, 153
Mechanics, 101
Modelling of rotors, 359
MODELLING OF ROTORS WITH THREE-DIMENSIONAL SOLID FINITE ELEMENTS, *Paper*, 359
Moiré interferometry, 101
MOIRÉ INTERFEROMETRY FOR ENGINEERING MECHANICS: CURRENT PRACTICES AND FUTURE DEVELOPMENTS, *Paper*, 101

NEW FORMING LIMIT DIAGRAM OF LASER TAILORED BLANK, *Paper*, 143
Notch roots, 287
Numerical methods, 611
NUMERICAL METHODS TO PREDICT FAILURE DURING THE IN-SERVICE WELDING OF GAS PIPELINES, *Paper*, 611
